Continuation of Substance of Interview including description of the general nature of what was discussed: the Examiner indicated that the prior art of record still appeared to read on the claimed invention since Ta, while a metal layer, was known in the magnetic sensing element art as an insulating (or low conductivity) material. The Examiner provided references illustrating this and noted that incorporation of the subject matter of claim 7 into the independent claims, as well as addressing a minor 112 issue in claim 28 would bring the case into condition for allowance. Applicants agreed to the proposed changes..
